Save The Date

Greetings from Hamburg!

We invite you to be part of the 4th International Conference On Pediatric Liver Disease in Hamburg. It is our mission to connect health care professionals engaged in pediatric hepatology, surgery and transplantation in order to exchange insights into the latest diagnosis, treatment, and up to date research in pediatric liver disease. This year's symposium will focus on biliary atresia, autoimmune hepatitis and liver transplantation. We are also happy to specifically discuss liver transplantation in metabolic diseases.

We, again, cooperated closely with the European Reference Network on Rare Diseases, especially ERN Rare Liver and MetabERN.

Due to the ongoing pandemic the conference will be held online. Nevertheless, we hope to continue last years' interactive character of the conference.

We wish us an interesting and insightful conference.
